Generali Minerali | Biography

Giorgi Jincharadze, a.k.a. Generali Minerali & Construction, is a producer, DJ, and live performer based in Tbilisi, Georgia, and a resident artist and crew member of the TES Club collective, Meteor Studio, and Tears in Club Radio. Known for his versatile approach, Generali Minerali creates music that blurs the lines between genres while staying rooted in electro and techno aesthetics. His sound is raw, experimental, and deeply rhythmic, often combining heavy machine funk with abstract textures and broken patterns.

His releases have appeared on labels such as RFR Records, Mind Controlled Rectifier, Undersound Recordings, and others, reflecting a sound that constantly evolves but remains distinctly his own.

Construction is an alias of Generali Minerali, focused more on deep, experimental and techno music. The project began in 2015 and continued until 2017, after which it was paused for many years until 2026, when its live performance debut took place on the stage of Bassiani. The artist plans to release new material under this project in the future, with more details to be announced soon.
